

## Design Your Own Moth

Use the images and specimens you saw in the *Moth Matters* exhibit and your imagination and creativity to design your own moth.

First choose the shape of your moth from the outlines provided. Then design your moth using patterns (stripes, spots, swirls, etc.) and your favorite colors. Add as much color and detail as you want.

How does your moth compare with others you have seen? How does it compare to those in the exhibit and in your backyard? Where does your moth live? What does it eat? Add those things to your drawing.
